Senior Software Engineer | .NET Core | Azure | Microservices | Angular/React

Full Stack Engineer with 10+ years of experience building scalable backend systems and cloud-native applications using .NET Core, C#, Azure, and Microservices. Proficient in front-end frameworks (Angular, React, JavaScript/TypeScript) and modern DevOps practices (Docker, Kubernetes, Terraform, CI/CD). Proven track record in architecting enterprise-grade solutions, leading teams, and driving end-to-end development from APIs and databases to responsive UIs.

CORE COMPETENCIES

- **Backend:** .NET Development, ASP.NET Core (C#), ASP.NET Framework, ASP.NET MVC, ASP.NET Webforms, Web API, Entity Framework, Pub-Sub (MQTT, Kafka), Caching (Redis, In-memory Cache), NoSQL (MongoDB CosmosDB), RDBMS (MySQL, Microsoft SQL)
- **Architecture & Scale:** Microservices, Monolithic to Microservices migration, Distributed Systems, Serverless Computing
- **Full stack:** JavaScript Framework (Node.js, Typescript, AngularJS, React), Scripting (Python, Shell), REST API Development, GraphQL
- **DevOps / Infrastructure:** Infrastructure as Code (Terraform), Docker, Kubernetes, Cloud PAAS (AWS, Azure, GCS), Nagios, CI/CD, Systems Architecture, DevOps Practices
- **Security & Authentication:** OAuth, JWT
- **Testing:** Unit Testing (Jest, XUnit)
- **Emerging Technologies:** Blockchain (Ethereum Dapps, Solidity), Prompt Flow, Prompt Engineering
- **Project Management & Software Revision:** Agile Methodologies, JIRA, Git, SVN, Figma

WORK EXPERIENCE

Sr Software Engineer – Intelx Technology

Bangalore | 2023 – present

Project: Intelx One (V6 platform Cloud SaaS)

- **Architected and developed an AI-driven automation tool (Microsoft Prompt Flow + .NET Core)** that cut bug resolution time by 55% and scaled across multiple product lines.
- Built Qualification Management Application (TypeScript, Angular, GraphQL, MongoDB), **overseeing code reviews, maintaining code quality**, and ensuring **>90% code coverage achieved**.
- Integrated **Auth0 M2M authentication** to secure API access, boosting external API adoption by **30%**.
- Collaborated across engineering teams, driving **technical debt resolution, code quality improvements, and reliable CI/CD releases (Azure DevOps, Docker, Jenkins)**.

Specialist – Tata Elxsi

Bangalore | 2016 – 2023

Project: ABB PAMA Platform

- **Led a team of 5 engineers to modernize legacy monolithic systems into microservices** (ASP.NET Core, Docker, Kubernetes, Redis, Kafka, MongoDB).

- Designed and implemented a **centralized logging framework (Kafka, Grafana)**, reducing debugging time by **80%**.
- Developed scalable **REST APIs** serving **100+ enterprise clients** across manufacturing automation.
- Built and optimized **AngularJS front-end modules** for user dashboards, integrated with backend APIs.
- Partnered with stakeholders to **refine requirements and propose** distributed **system architectures** aligned with business goals.
- **Scheduled development timeframes** and coordinated with stakeholders for smooth sprint releases throughout the software development cycle.

Project: ABB PAMA License Manager

- Delivered license management system in an Agile setup using **C#, SQL Server, and RESTful APIs, Angular, ASP.NET Core, Azure Functions, CosmosDB**.
- Designed and coded backend services enabling **secure license validation across distributed environments**.

Project: Ad tracking using blockchain (POC)

- Built backend using **Node.js** to capture ad events, integrated with **Google IAMA SDK**.
- Implemented **Solidity smart contracts** to persist ad events on **Ethereum blockchain**.
- Developed a **React-based UI** to showcase blockchain-verified ad transactions.

Software Engineer – Peepal Software

Bangalore | 2014 – 2016

Project: Infrastat

- **Maintained Linux-based production systems** with 99.9% SLA uptime.
- Automated VPN & SMSC monitoring using **Nagios + Shell & Python scripts**, reducing downtime incidents by **30%**.
- Designed and executed **backup & disaster recovery plans** ensuring zero data loss.
- Deployed and version-controlled software releases using **SVN**.

CERTIFICATIONS

- Blockchain Developer Certification, ConsenSys Systems 2019
- (In Progress) **Microsoft Certified: Azure Developer Associate (AZ-204)**

EDUCATION

Bachelor of Engineering (Electronics & Communication) – Acharya Institute of Technology, Bangalore (VTU)
2008 – 2012 | First Class
